

**Digital Die Cut files should be identified with a 100% Magenta Stroke and saved on a separate layer.**

- Open/Create a new file.
- In the Layers Palette, create a New Layer named Die Cut.  
*Additional finishings such as 'Score' and 'Route' can be placed on separate layers with 100% stroke, and no fill.*

- Create a vector die line in Die Cut layer.  
*Die Line is to be a 1 pt. 100% Magenta stroke, with no fill.*
- Please provide necessary bleed in the artwork or on a separate layer.
- Save As... Illustrator EPS (eps), or Adobe PDF (pdf), or Adobe Illustrator (ai)  
*All of these file types are acceptable file formats.*

**Please call with ANY questions, and thank you for your business!**
