**White ink files should be identified with a
100% Magenta Fill and saved on a separate layer.**

- Open/Create a new file.

- In the Layers Palette, create a 'New Layer' named White Ink.

- In the White Ink layer, identify white ink spot placement as 100% Magenta fill, with no stroke.

- Save As... Illustrator EPS (eps), or Adobe PDF (pdf), or Adobe Illustrator (ai)
  All of these file types are acceptable file formats.

Please call with ANY questions, and thank you for your business!
